

## Dallas –

Dallas has been in his new home for just one month now after being adopted July 4/12 by a wonderful woman, and it sounds like he's really enjoying his new home, family, horse friends and lifestyle ! Here's an update from his new owner..." He has had three body work sessions, two hoof trimming re-adjustments and gets brushed and loved every-day by myself or our grandson. Dallas just loves Reeve our grandson. He follows him everywhere when Reeve is in the paddock with him. Reeve asks him to put his head down so he can put on his face mask or take it off, plus his halter when needed and Dallas is more than happy to do so. Reeve has found that Dallas also loves his belly scratched from front to back. Puts a big smile on both of their faces. Dallas is going to have one more body work done today and then he is getting fitted for his new boots. He is in heaven(relaxed) when the body worker and the farrier work on him. He is a bit nervous around new people but we take it slow and he relaxes. He loves his walks and now when he has his new boots on, our grandson will be able to be a passenger if Dallas can hold any weight. We will see how he feels first. Take care and Dallas says hi to you all.
