

Sweetpea –

"I think she will end up being the lead mare too. She is getting the routine down now, she will come to the paddock gate at night now so I can lead her out and she has the cutest softest whinnies going while I am getting everyone's grain together." "It was great that we caught Blue and Sweetpea talking over the fence. There was no squealing. I think they quite like each other. Yay". "Yes she sure does like her stall, when we go to bring her in from the paddock she breaks into a trot to the barn :) " "I put Sweetpea out in the big field today with Blue, they are mostly ignoring each other though Haley saw them touch noses. Sweetpea is having a good time exploring the field and I even saw her canter a bit. Blue is hanging out down by the other horses and Sweetpea joins him to eat the hay together" "After the farrier comes this morning, the girls, Haley and Paige, will be taking Sweetpea and Panda for a little trail ride around the property this afternoon, it's such a beautiful sunny day." "Since Sweetpea gets the most grain of all the horses, she stays longer in the stall in the morning, and the rest of the herd goes out first...she doesn't mind at all being left there to eat quietly, and enjoys her special meals !"

Lovely rolling

In her own field for now

Her pals, Tyler and Blue

Blue, Taylor, Haley and Sassycat

Sweetpea and Haley

Sweetpea was accepted right away by the herd, and they all felt very comfortable with her as their newest member.
